## RESIDENT SURGEON'S REPORT.

From the preceding tables it may be seen, on comparison with last year's report, that the number of persons received into the Hospital during the year 1861, is somewhat less than in the previous twelve-months: the decrease however is solely due to the reduction in the available accommodation, which the Committee have been compelled to introduce, in consequence of the building works now in progress; as at the present time, the medical officers could fill double the number of beds now at their disposal with deserving cases were they in a position to do so.

The mortality during the past year shews a decrease of from 19 to 13 per cent. on the total number of cases under treatment, as opposed to last year, and of those which have terminated fatally, 21 were moribund when admitted; 3 died within 24 hours of their reception; 10 within 48 hours, and the remainder within 4 days; 12 deaths have been the consequence of accidents of a fatal character, and 22 have resulted from Phthisis, diseases of the heart and brain, cancer, aneurism, and other maladies beyond the reach of medical skill.

Out of 130 casualties received, 108 have been successfully treated, and in addition to the in-door patients, out-door patients have received advice and medicines upon 7325 occasions, on the recommendation of governors and subscribers to the institution.

W. P. WHITCOMBE, RESIDENT SURGEON.

THE  
FIFTH ANNUAL REPORT  
OF THE  
COMMITTEE OF MANAGEMENT  
OF THE  
BALLARAT DISTRICT HOSPITAL.

---

At the expiration of their term of office, the Committee of Management of the Ballarat District Hospital have the honor to present to the governors and subscribers a report of the past year's transactions, and a statement of the present position and future prospects of the Institution. In doing so, they can point with satisfaction to the many benefits conferred, through its agency, upon the poor and suffering during the period that they have had the management, and have acted as administrators of its funds.

During the year 1861, 606 persons have been under treatment in the Institution. Of this number, 470 have been cured or relieved, 84 have died, and 52 remained in the house on the last day of the year. In addition to this number, 2013 out-patients (who have been attended to upon 7325 occasions) have received advice and medicine gratuitously, upon the recommendation of the governors and subscribers to the Hospital, making a total of 2619 cases treated, and showing an increase of 757 on the preceding year. This increase, however, is solely referable to the greater number of out-patients who have attended, as the cases treated in the house are less by 86 than those received in the year 1860. This is accounted for, however, by the loss of the old female ward, which has been thrown into the wing now in course of erection, and thus temporarily restricted the available accommodation.

Accidents, fractures, and injuries from violence form, as may be supposed, the most prominent features in the list of cases treated. Rheumatism and heart disease have also been very rife; but fever does not appear to have been so prevalent as hitherto; and it is satisfactory to find that the per centage of deaths is considerably lower than it has previously been.

With reference to the financial position of the Institution, your committee are glad to state that the current expenses have been much reduced. This is due in a great measure to the difference in the price

of the articles of consumption now in use ; and also to the members of the House Committee, who are deserving of the best thanks of the contributors for the persevering industry with which they have labored to combine a careful system of domestic economy, with the greatest amount of general efficiency. They are also happy to record their sense of the care and attention with which their secretary, Mr. E. C. Moore, has discharged his duties, and in appreciation of his services, extending over a period of more than four years, they have unanimously presented him with a gold watch and chain, believing him to be fully entitled to the confidence and esteem of the governors and subscribers.

The balance sheets of the general and building accounts, of which copies are annexed, contain minute details of the receipts and expenditure under each head. During the year, £6895 8s. 2d. have been received from all sources on account of the general fund; while the expenditure, including a sum of £57 14s. 4d. paid for bank interest, and £800 transferred to the building fund, amounts to £6410 18s. 1d. leaving a surplus of £484 10s. 1d. On account of the building fund £2400 12s. have been received, and but £150 as yet expended, so that £2250 12s. are still available. While upon the subject of finance, the committee would express their grateful sense of the support which they have received from the public generally during the past year. While the committees of similar institutions in other parts of the colony appear often to have a difficulty in raising a sufficient amount by private contribution to enable them to claim the Government grant upon the usual terms, this Institution has been in a position to assert its right to a sum even larger than that voted for it by the Legislature; and last year including the votes from municipalities, the private contributions reached the very considerable sum of £2209 6s., Nor are the subscribers to this list confined to any one class or to any special locality. All sections of the community appear to be fairly represented, and the inhabitants of many of the townships in the vicinity, having experienced the benefits of the Institution, now exhibit a lively interest in its support. With a view to the further encouragement of this feeling, the following gentlemen have kindly consented to act as honorary agents and receivers on behalf of the Institution, in their respective districts :--Messrs W. B. Lees Coroner, Creswick; L. Henderson, Merchant, Beaufort; J. Kennelly, Union Bank, Smythesdale; S. Lewers, Bank of New South Wales, Linton.

The Municipal Council of Ballarat have also contributed materially towards the reduction of the expenses by inserting a clause in the lease

of the Water Works, exempting the Hospital authorities from paying for the water consumed on the premises, whereby a considerable saving will be effected.

In the month of May, Mr. Henry Hill having resigned the office of house steward and dispenser, a special meeting was convened to elect his successor, when Mr. D. M. A. Gray having a majority of votes of those present, was chosen. Mr. W. B. Robinson has also been compelled to resign his trusteeship, on account of his departure from this district.

In the last annual report it was stated that a sum of £1,200 had been placed upon the Estimates for building purposes, and that £400 must be contributed from private sources, to enable the committee to claim the amount. This condition was promptly complied with, and the committee finding the sum of £1,600 at their disposal, active steps were at once taken for the building of the new wing, in conformity with a design furnished by Mr. C. D. Cutlibert, and selected on the recommendation of the honorary medical and surgical officers, after mature and protracted deliberation.

Tenders for the work having been invited, that of Mr. A. Stombuco for £1,580, being the lowest was accepted, and building operations were commenced at once. The removal of the old female ward, however, soon showed the end north wall to be in a dangerous state, and it became necessary to adopt means for its efficient and immediate support. At this juncture, the propriety of erecting a new centre to the building was discussed, but the committee unwilling to burden the institution with a heavy debt, determined to have the new wing erected at a distance of sixteen feet from the old centre, and to connect the two by a building, which will at the present time afford accommodation for the out-patients, a board room for the committee, and may ultimately form a portion of a new centre building, as designed by the architect. These additions, together with certain drainage works rendered necessary by them, will increase the building expenses by about £900, to meet which, application has been made to the Government for a further grant this year, and a sum of £800 has been transferred from the general fund to the building fund. It is with sincere regret and indignation, that your committee have to bring this additional outlay under your notice, rendered necessary by the gross neglect and inferior work of former architects and contractors, but they trust that these additions will enable their successors, at least for some time to come, to meet all legitimate demands, and relieve every case of sickness and destitution, which may be presented to them.

As regards the drainage of the institution at the present time, it is undoubtedly, both deficient and defective; nor do your committee see how it will be possible to effect any permanent improvement in the matter, until some complete system of public sewerage shall have been introduced.

Before concluding their report, your committee feel it a matter of courtesy, to acknowledge the valuable services, so cheerfully rendered to the institution, by the honorary medical and surgical officers, and building committee, in discharge of their various duties. They would also record their sense of the manner in which the resident surgeon and dispenser have carried out the management of their respective departments.

And now, having briefly reviewed the more important occurrences of the year, your committee relinquish their trust, congratulating the governors and subscribers, upon the satisfactory position of the institution, which so soon as the works now in progress shall have been completed, will, they are assured, stand out in bright relief—a source of pride to all who have been instrumental in its establishment and support, and a blessing to the district in general.

## CAUTION.

RULE 1.
