

Bridging an allied health 'know-do' gap on delivering community-based group health programs with technology: an integrated knowledge translation approach

Jaelyn Bishop, Western Alliance Research Translation Coordinator, Ballarat Health Services
Dr Claire Quilliam, Rural Nursing and Allied Health Research Fellow, The University of Melbourne
Dr Rosemary King, Lecturer- School of Health, Federation University
Associate Professor Anna Wong Shee, Associate Professor Allied Health, Ballarat Health Services & Deakin University

Integrated Knowledge Translation (iKT)

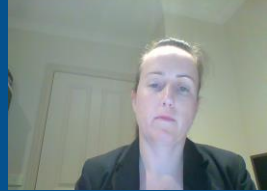

KT continuum

**Knowledge transfer
'End of grant KT'**

**Co-production
'integrated KT'**

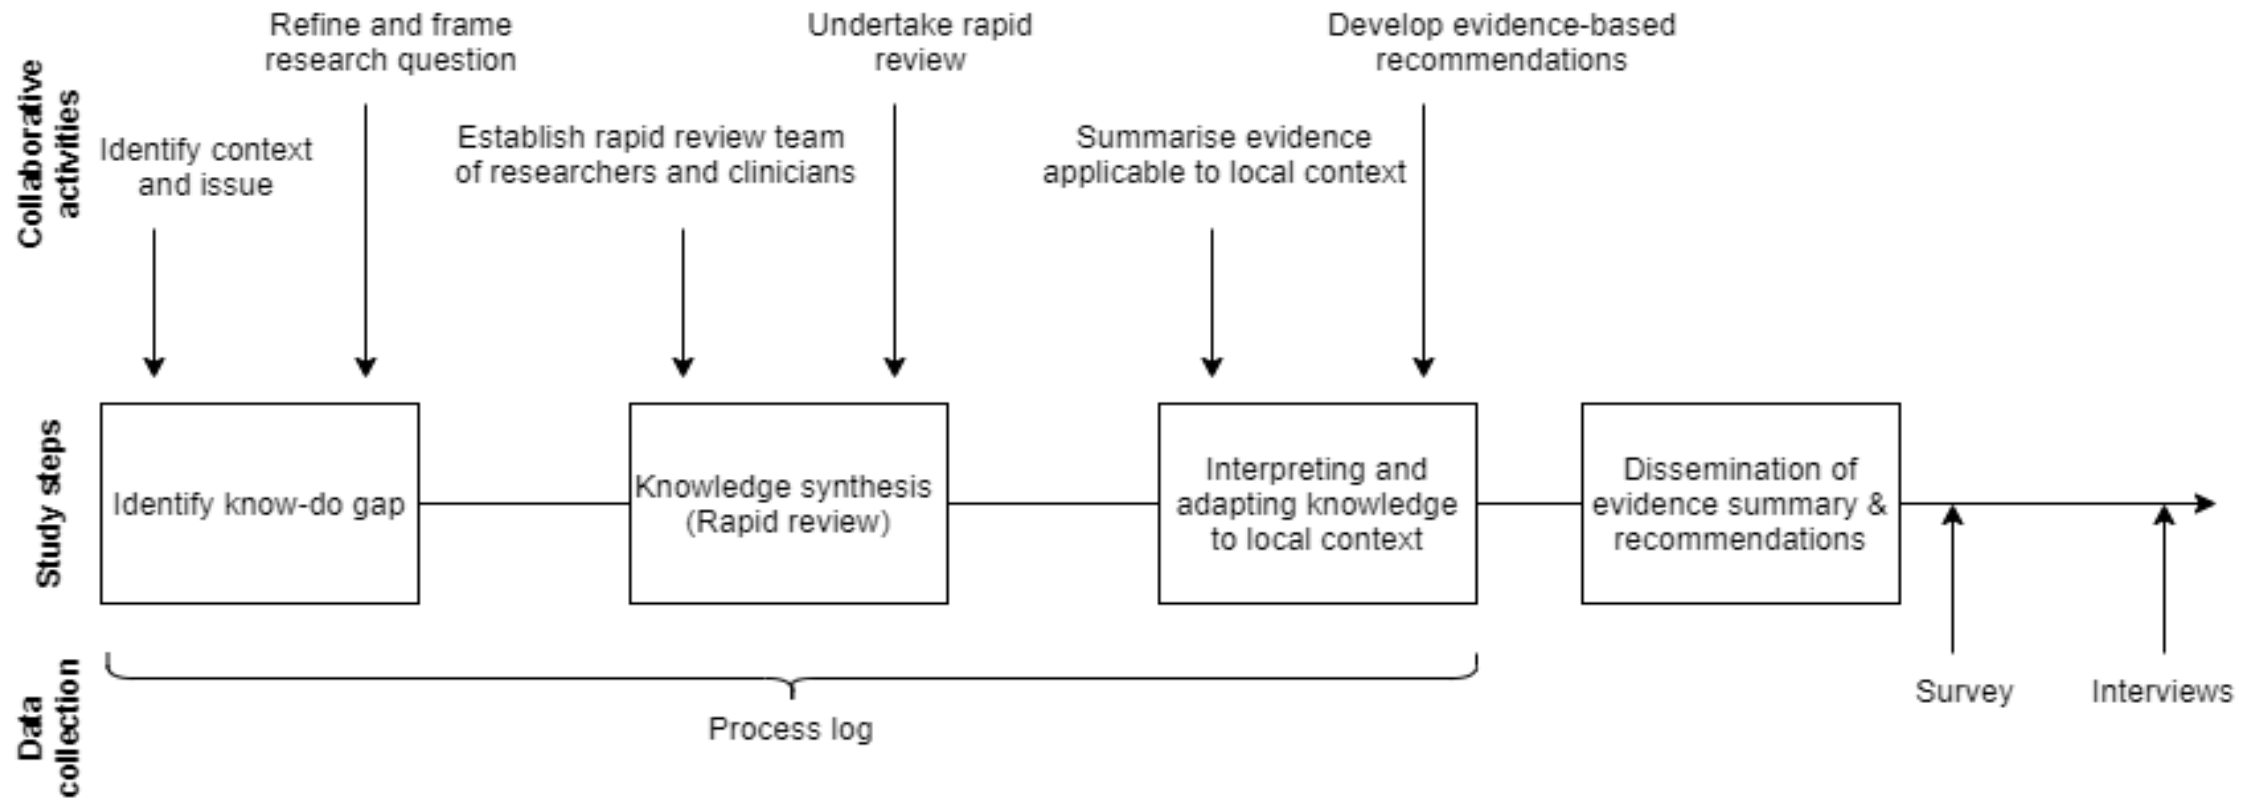

Aim and method

Knowledge-users from two health services

Researchers from five universities

Context

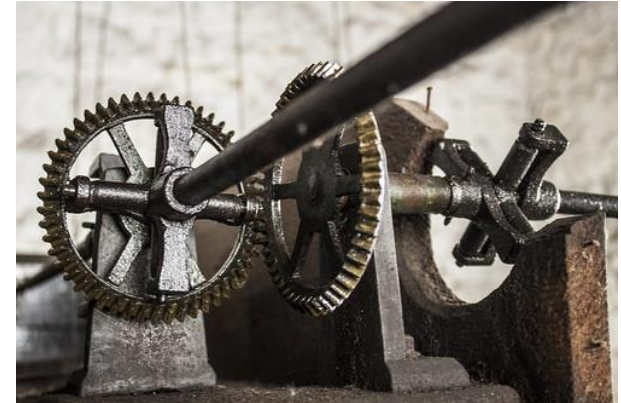

- Common urgency for knowledge
- Relevancy more imperative
- Pressure to adopt telehealth
- Limited prior research opportunities for early career staff

Mechanisms

- Team development
- Activities slanted towards
 - knowledge production
 - researcher-led
- Flexible involvement

Outcomes

- Affirmation of changes already made
- Intention to use
- Exemplar of knowledge-user engagement

Practice and research implications

- Rapid and remotely delivered iKT can work
- Greater focus on implementation and practice change
- Rural research structure
